 AORTICLAB

FLOWer

WITH CATCH & FLOW TECHNOLOGY

EMBOLIC PROTECTION DEVICE

FOR **TAVI** AND OTHER
TRANSCATHETER
CARDIOVASCULAR
PROCEDURES

ESSENTIAL PATIENT PROTECTION

Designed to **reduce the risk of stroke** in high-risk patient **and systemic embolic events** during complex procedures

CONFIDENCE WITHOUT DOUBT

FLOWer is **safe** and **effective**, supporting better outcomes with proven clinical performance

BE READY WHEN IT MATTERS

Be prepared with FLOWer in your cath lab **when treating patients** who may benefit from added protection.

>99%

Microspheres blocked from reaching the brain

-57%

major adverse events (MACCE @30 days)

-40%

total volume of new brain lesion vs OPC

ONE DESIGN, 3 SIZES

The different sizes guarantee a **perfect fit with aortas** ranging from 25 mm to 39 mm.

Size	Nominal Size (mm)	Expansion Range (mm) (D1)
FLOWer 28	28	≥ 25 TO 29 (included)
FLOWer 32	32	> 29 TO 34 (included)
FLOWer 36	36	> 24 TO 39 (included)

CELEBRAL PROTECTION

Captures debris >60 µm to help reduce stroke risk

BEYOND THE BRAIN

Protection also for peripheral circulation

SAFE ACCESS

No additional access site
12 fr compatibility

DESIGNED FOR PRACTICE

- **12 Fr** introducer compatibility
- No need for a further access site thanks to the customized pigtail provided with the device
- Minimal to no interference with existing TAVI delivery systems
- Enhanced tactile sensitivity and stability for precise positioning

SAFE BY DESIGN

- **Minimal thrombogenicity**
- **Non-traumatic** against the aortic wall
- ACT adjustment as per standard procedures
- Gentle on the vascular access site
- **Stable during deployment** with adjustable distal structure and adaptive spine

ADDS AT MOST **3 MINUTES** TO DEPLOYMENT WHILE PROVIDING **COMPLETE EMBOLIC PROTECTION**
